Pierce Recommended Naming	Pierce Standard colors. Pierce had these colors established before NFPA had a recommended color coding chart for inlets/outlets. When using this color coded chart, keep in mind that the inlet/outlet colors are selected from the top down and then from left to right. If the first available color is already used by a previous inlet/outlet, move right in that column and select the next available color. If you run out of color choices in the chart, use a color that is not being used somewhere else on another inlet/outlet.						NFPA Recommended colors per NFPA 1901, section A.16.9.1
